DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by van Manen 5569476.

Manen teaches the claimed apparatus and method for conditioning objects in plastic material, the device having a turret 45 that is introduced between two mold halves 50a, 50b, and transferring a group of the objects onto one side of the turret 44, the turret being tilted to different cooling positions A, B, C, D. The turret having cooling channels (Col. 5, lines 9-11) and the turret also having the individual casings within to hold the objects (see Fig. 8 and 9). The operation of the device includes the claimed method of bringing the turret into position between the molds and removing the objects.
